Office Action Summary	Application No. 10/812,991	Applicant(s) HAPP ET AL.	
	Examiner Edward Wojciechowicz	Art Unit 2815	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-20 in the reply filed on 7-26-06 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamoto et al (2005/0127524) in view of Moore et al (6,348,365) and Kozicki et al (5,761,115). The reference to Sakamoto teaches the inventive structure whereby a switching device is formed that utilizes a solid state electrolyte formed between electrodes and with metal ions generated in the electrolyte which are then reduced to form a metal concentration within the solid state electrolyte, as claimed.

While the references to Moore and Kozicki are specifically cited as prior art by Sakamoto, and constitute part of the Sakamoto disclosure, they are cited individually in this rejection to provide a more complete recitation of the related prior art. Specifically, Moore, for example, at col.3, l.15-22 teaches that a silver metal connection may be formed in conjunction with a glassy material, while Kozicki specifically teaches a related structure which uses a chalcogenide glass.

These references also teach the use of the specific materials claimed, along with the operational voltage ranges, and one skilled in the art would be motivated to combine these teachings in view of Sakamoto's specific mention of these references.
